Body Temperature Measurement Video System

Asset Protection Corporation (APC) is committed to offering the latest technology in response to COVID-19. Given the current social conditions people returning to public buildings and businesses are concerned with exposure. APC is pleased to offer a solution that will provide surface body temperature readings using non-invasive infrared surveillance cameras that can be installed at strategic building entry points.

System Features:

- Provides Temperature reading for people passing through camera field of view
- Temperature accuracy within 0.54°F
- Alarm Trigger for elevated temperature detection
- Up to 16 simultaneous body detection readings within camera view
- Can be recorded to most existing surveillance systems or stand-alone use
- Can connect to existing access control system for custom alarm, notification and system reporting
- Non-invasive IP Thermal and Digital camera overlay

To Learn More:

Contact APC at 419-531-3400 and ask to speak with Gary Lemle or Kevin Klewer.
